

a brief introduction to THE EDUCATION IN FINLAND

Finnish Education System based on

[FINNISH EDUCATION SYSTEM](#) is based on trust, responsibility and the philosophy of inclusion. Finnish education is mostly publicly funded. The schools have highly educated teaching personnel and educational autonomy is high at all levels. First national examination is at the end of general upper secondary education.

LEARNING OUTSIDE THE CLASSROOM IS
COMMON -LEARNING IS NOT DEPENDING ON TIME
OR PLACE. VIDEO

Transversal Competences

There is a strong emphasize on transversal competences

Teacher's task is to instruct and guide students to become lifelong learners.

The pedagogical approach is in the student-centered interactive and inspiring learning sessions that enhance students' creativity, critical thinking and participation.

Students set goals, solve problems and assess their learning based on set targets.

Learning is an active, goal-oriented and self-motivated action.
